Summary

Software Developer with 3+ years of experience designing and building scalable systems for SaaS platforms and product-focused teams. Skilled with AWS cloud services and modern databases to deliver robust, reliable applications. Hands-on experience designing RESTful APIs, backend services, and user-facing features using JavaScript, Python, and Ruby. Proven experience developing on AWS with CI/CD pipelines, serverless and microservices architectures. Strong problem solver with an architectural mindset, experienced in collaborating with cross-functional teams to deliver reliable, user-friendly products in fast-paced environments.

Skills

- **Programming Languages**: JavaScript (ES6+), Python, Ruby, Java, HTML, CSS, SQL
- **Frontend & Full Stack**: React, Node.js, REST APIs, jQuery, FastAPI, Rails
- **Databases**: PostgreSQL, MySQL, Redis, DynamoDB, Snowflake
- **Cloud Technologies**: Microservices, AWS SQS, EC2, Lambda, API Gateway, S3, Cloudwatch, IAM
- **DevOps & Tools**: Docker, Git, CI/CD, JIRA, OpenAI, LangChain, Postman, Superset
- **Software Engineering**: Object-Oriented Programming, Database Management Systems, System Design, Software Development Life-Cycle (SDLC), Data Structures & Algorithms, Unit Testing
- **Soft Skills**: Problem Solving, Collaboration, Communication, Adaptability, Mentorship

Experience

- **PlanSource** Bengaluru, India

  Software Development Engineer *August 2022 - September 2025*

  - Built user-facing features and integrations using React.js, JavaScript and web frameworks, improving application usability and workflow efficiency.
  - Developed scalable backend services and REST APIs for SaaS platforms using Ruby on Rails and Python (FastAPI), supporting millions of enterprise users.
  - Designed and developed GenAI-driven proof-of-concepts, delivering MVPs like RAG-based recommendation, summarization tools, and agentic assistants.
  - Supported software releases by automating CI/CD pipelines and monitoring deployments with CloudWatch, reducing failures and boosting release confidence.
  - Led the removal of Looker embeddings and integration of Superset dashboards in the core platform, saving over $200K annually in licensing costs while maintaining data accuracy across dashboards and visualizations.
  - Developed event-driven data sync pipelines using AWS SQS and Lambda for large-scale HCM partner integrations.
  - Built a plan recommendation system using AWS Bedrock that analyzed user demographics and survey responses to deliver personalized recommendations with over 95% accuracy.
  - Added critical functionalities such as username and password resets in the RASA-based chatbot, ensuring secure and convenient user access.
  - Developed a JSON/XML payload validation system ensuring compliance with LIMRA schema, resolving client issues related to incorrect data transmission.
  - Hands-on experience working across diverse database technologies, including relational (PostgreSQL, MySQL), NoSQL (DynamoDB), in-memory caches (Redis), and data warehouses (Snowflake).
  - Conducted comprehensive code reviews to uphold high coding standards, ensure best practices, and improve team efficiency and documentation.
  - Strong experience working closely with product, design, and leadership to understand requirements, estimate efforts, and deliver features aligned with the organization's operational excellence goals.

Education

- **College of Engineering Roorkee** Roorkee, India

  B.Tech in Computer Science and Engineering *2018*

- **Doon International School** Dehradun, India

  XII CBSE *2013*
